

EXPERIENCE

- **Accenture** February 2023 - Present
Data Analyst Belgrade, Serbia
 - Developed and maintained Python tools for mobile network data validation and non-network anomalies elimination.
 - Proposed and developed a Python tool leveraging OpenAI API to summarize automated KPI check reports using LLMs, significantly accelerating report analysis for engineering teams.
 - Developed tools for automated KPI checks using rule-based logic, reducing manual analysis and accelerating reporting workflows.
 - Analyzed telecom datasets to identify performance patterns and support automation rule development.
 - Technologies used: **Python, Git, AWS, Excel, Tableau**
- **Cetin** Summer 2022
Telecommunications Engineering Intern Belgrade, Serbia
 - Learned about LTE/5G infrastructure, signaling flow, and inter-department collaboration.

EDUCATION

- **University of Belgrade** October 2022 - July 2024
M.S.E in Electrical Engineering Belgrade, Serbia
 - **Thesis:** "Statistical Analysis of Internet Services in Mobile Networks"
- **University of Belgrade** October 2017 - July 2022
B.S.E in Electrical Engineering Belgrade, Serbia
 - **Thesis:** "New Design Principles in Organizing 5G Core Network"

PROJECTS AND COURSES

- **Weather Forecast Agent (Personal Project)** 2025
Flask Web Application & Weather Database Integration
 - Built a weather chatbot that answers natural language queries using historical temperature data spanning over a decade.
 - Used OpenAI's LLM API and Python to convert user inputs into structured SQL queries for comparing and retrieving temperature data.
 - Developed a Flask web interface to capture queries and trigger database searches using parsed city, date, and time range inputs.
 - Technologies used: **Python, SQL, OpenAI API, Flask, HTML/CSS.**
- **Deep Learning Specialization — Coursera (Andrew Ng)** 2025 (4/5 Completed)
Online Course
 - Completed courses in the specialization:
 - * "Neural Networks and Deep Learning", "Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization", "Structuring Machine Learning Projects", "Convolutional Neural Networks"
 - Gained practical experience using TensorFlow and Keras to build and optimize deep neural networks.

SKILLS

- **Programming:** Python, Tensorflow, Pandas, SQL
- **Data analysis:** Tableau, Excel
- **Telecommunications:** Wireshark (packet analysis), TEMS Investigation
- **Infrastructure:** AWS
- **Tools:** Git, VS Code
